# ISLE OF MAN LABOUR MARKET METHODOLOGY AND CONTACTS

## METHODOLOGICAL NOTES

Registered unemployment is measured as a claimant count of those persons registered for Job Seekers Allowance (JSA). There is no legal requirement to register to receive Job Seekers Allowance.

International Labour Organisation (ILO) definition

There are two common measures of unemployment: the claimant count (as detailed above), and that used by the ILO. The ILO measure includes not only those who are registered as unemployed (such as claiming JSA) but also those who are not registered but may still be looking for work.

Historically, the Island has only published the ILO definition of unemployment when census results have been made available. This report uses analysis of the ILO unemployment rate and the claimant count rate to generate an estimate of number of individuals that may be unemployed and actively seeking work but not registered as doing so.

In February 2022, the economically active population used in the calculation of the unemployment rate was updated to 44,875 to bring in line with the 2021 Isle of Man Census. The previous figure, based on the 2016 Census, was 42,777.
